

Children's Medical Services

Technology

CMS is on the cutting edge of using technology both for patient services and organizational processes.

Our telemedicine program uses special equipment to provide health care services to children and youth who are at a different location than the specialty doctor. It is a safe, secure way to receive medical care from a doctor who may be located hours away.

CMS also uses video conferencing equipment to share ideas and meet statewide:

- Meetings
 - regional management team meetings
 - statewide medical directors meetings
- Reviews
 - contract desk reviews
 - area office quality management reviews
- Distance Learning

TITLE OF TRAINING	# OF PARTICIPANTS	# OF SATELLITES	SPONSORED BY
